

JASA HP

HIGH PERFORMANCE COLD PATCH

JASA HP Cold Mix is the optimal solution for repairing potholes, patching, utility cuts, and other pavement repairs. This superior cold mix asphalt can solve any pothole problem long before it becomes a major, and costly, pavement issue. JASA HP works in extreme weather conditions by incorporating asphalt with the most advanced adhesion promoter and anti-strip engineered to produce a permanent patch within minutes of work.

Benefits of JASA HP

- Exceeds DOT specifications
- Engineered for the extreme weather conditions of the Northeast
- Mixed in a hot mix asphalt plant at low or no fire or a single bin pug mill

The preferred aggregate mix is #9 limestone meeting the following specifications:

- 3/8 100% passing
- No. 8 10-40% passing
- No. 16 0-10% passing
- No. 50 0-5% passing

This mix is just a recommended guideline. JASA HP has been manufactured with both gravel and slag, and engineered to work with multiple sieve specifications. The material is designed to coat multiple aggregates and can be custom blended to work with your specific aggregate.

Our Product Engineer will be on site to ensure your mix is produced correctly. That is why we back our material 100%. With ten years of R&D, our customers get the highest performing material at the most effective price.
