

GRIP-TIGHT

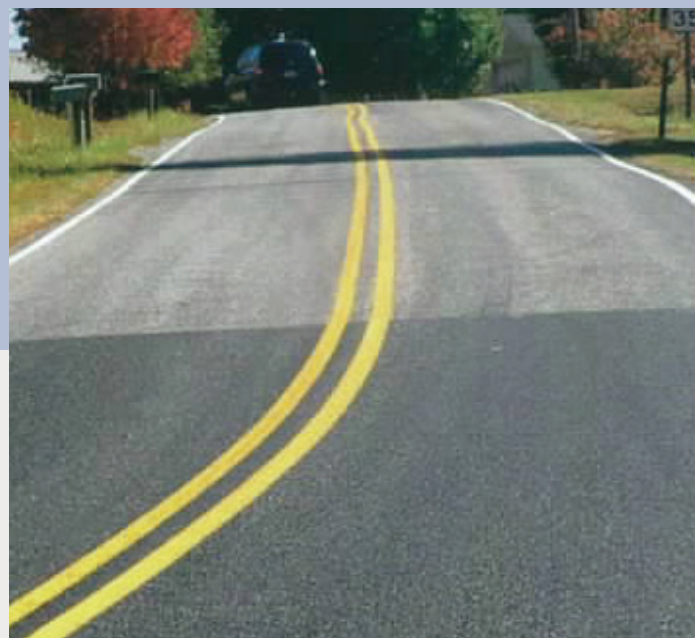

READY FOR TRAFFIC IN ONLY 30 MINUTES.

Grip-Tight is a highly-polymerized, asphalt emulsion that is specially designed for fog seal and flush coat applications. This high performance product gives excellent stone retention on seal coated roads and enhances the aesthetic characteristics of the surface. The product cures quickly after application and vehicle traffic may be released onto the roadway within 30 minutes.

Grip-Tight

- Preserves roadway shoulders – extends the life of shoulders by up to 2 to 3 times their normal expectancy
- Holds down aggregates, resists water intrusion, and creates a better wearing surface
- Fast curing time after application – surface is available for traffic after 30 minutes and striping may be done after one hour
- Eliminates the need for sand application, which results in less labor and more cost savings
- Leaves a dark, shiny asphalt surface for best contrast against striping
- Eliminates asphalt tracking – won't stain bridge decks or concrete aprons
- Assists in mitigating minor reflective cracking
